DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nunokawa et al (U.S. Pat. 6,962,404) in view of Watanabe et al (U.S. Pat. 6,352,329)

Nunokawa discloses:

- regarding claim 3, the body includes a recess to receive any one of the number of removable inkjet cartridges (31 of Figure 1)
- regarding claim 4, a body for supporting each of a range of removable inkjet printer cartridges (Figure 1; Column 9, Lines 11-16), each inkjet printer cartridge within the range being able to operate at different print speeds (Column 10, Lines 34-56)
- the cartridge also having printhead contacts for receiving data and power for operating the printhead, and the body having complementary contacts for establishing an electrical connection with the printhead contacts upon insertion of the cartridge into the body (Column 11, Lines 3-17)
- a controller connected to the complementary contacts and configured to determine the print speed of any of the inkjet printer cartridges when inserted into the

Art Unit: 2853

body, such that the controller adjusts the operations of the printhead in accordance with the print speed corresponding to that installed cartridge (Column 11, Lines 18-31)

Nunokawa does not expressly disclose the following:

- **regarding claim 4,** each inkjet printer cartridge being of a type having a page width printhead

Watanabe discloses:

regarding claim 4, each inkjet printer cartridge being of a type having a page width printhead (Column 1, Lines 10-23), for the purpose of increasing printing speed

At the time the invention was made it would have been obvious to a person of ordinary skill in the art to incorporate the teaching of each inkjet printer cartridge being of a type having a page width printhead as taught by Watanabe into the device of Nunokawa, for the purpose of increasing the printing speed.

Response to Arguments

Applicant's arguments with respect to claims 3-4 have been considered but are most in view of the new ground(s) of rejection. Please see the above rejection regarding Nunokawa et al (U.S. Pat. 6,962,404) in view of Watanabe et al (U.S. Pat. 6,352,329).

Art Unit: 2853

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Uhlenhake whose telephone number is (571) 272-5916. The examiner can normally be reached on Monday - Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
